General Information	3
Oil Gauges	4

Robust **Skarke oil gauges** are used to directly check the engine oil and gearbox oil levels in machines and systems.

All types have the same **characteristics**:

- High-quality materials
- Clever and simple design
- High availability thanks to modular construction

Our **flexible production facilities** allow us to adapt our products to customer requirements at any time and meet tight schedules.

Skarke oil gauges are custom developed to the specific requirements of each customer. We do not supply off-the-shelf products but develop and manufacture according to your specifications.

Skarke oil gauges are implemented, for example, in tunnel construction and mining equipment. Absolute reliability is indispensable under such extreme operating conditions.

Material:

Passivated steel (chrome VI free)

Gauge glass:

Plexiglass

Completely sealed with silicone

Different variations available available on request.
