

Skarke GmbH
Your reliable partner

When you choose Skarke valve technology you get reliable and proven products that have already found their way into thousands of systems across the world.

Experienced and competent

With over 30 years of practical experience we supply series and special solutions for virtually all areas including internal combustion engines, filter systems, gearboxes, cooling systems and more.

Sonderausführungen für Ihr Projekt

Going far beyond our standard products, we would be happy to support you from your initial idea to the development and production of your custom solution.

Dispose Vent Measure

Components and systems for engines, gearboxes and equipment manufacturing

Dispose clean

Oil service valves

Our standard range of oil service valves is immediately available in all common sizes.

100% leak-proof – all valves are seal tested after assembly.

Custom solutions available by request.

Skarke valves at a glance:

- High pressure and temperature resistance (up to 100 bar, from -30 °C to +200 °C)
- High reliability in all operating conditions
- Connection angle: straight, 45° or 90°
- Low flow resistance
- Simple, safe handling
- Simple adaptation to customer specifications

Simply vent

Air-vent valves and filters

Select high-quality bleed valves as well as aeration/bleed filters from our standard range or simply have us manufacture the product you want. We'd be happy to perform product customization according to your specifications.

Consistently high quality

The benefits of Skarke bleed valves and aeration/bleed filters at a glance:

- Simple, sophisticated design
- Modular products: high availability of individual components

Measure accurately

Dipsticks, gauges and components

Oil dipsticks

Skarke oil dipsticks are manufactured exclusively of high grade materials and provide reliable operation in any environment.

Oil gauges

Our oil gauges are used in mining and tunnel construction equipment and also work under extreme conditions.

Components

In addition to our standard products, we also offer a range of related components and assemblies.

From the initial idea to series production, we custom produce all parts according to the specific needs of our customers, regardless of the quantities required.
